

MATT BURNETT

Software Engineer | Full-Stack Product Engineering | React, Node.js & TypeScript

Portland, OR | burnett.matt@gmail.com | (501) 276-7905 | linkedin.com/in/burnettmatt

PROFESSIONAL SUMMARY

Experienced software engineer and technical leader with 14+ years building full-stack products, developer platforms, and high-scale applications across e-commerce, fintech, healthcare, and travel. Deep hands-on experience with React and TypeScript since 2016, backed by Node.js, GraphQL/REST APIs, relational databases, Go, Java, and cloud infrastructure. At Shopify, built merchant-facing checkout experiences and later owned a full-stack internal AI platform used daily by thousands of employees. Strong record of leading architecture, modernizing legacy systems, mentoring engineers, and carrying ambiguous product work from design through production operations.

CORE SKILLS

Frontend: React, TypeScript, JavaScript, HTML/CSS

Data: PostgreSQL, MySQL, SQLite, SQL, RDBMS

Architecture: System design, full-stack systems, integrations, developer platforms

Backend & APIs: Node.js, GraphQL, REST, Go, Java/Spring

Cloud & Platform: AWS, GCP, Docker, Cloudflare

Leadership: Technical direction, architecture decisions, mentoring, cross-functional delivery

PROFESSIONAL EXPERIENCE

Shopify Apr 2021 - Aug 2026

Senior Engineer, Dev AI | Mar 2025 - Aug 2026

- Designed and shipped full-stack AI developer tools and workflow improvements using React, TypeScript, and Node.js across Shopify engineering.
- Owned and operated an internal AI chat platform with a React/TypeScript frontend and Node.js backend that became part of daily workflows for thousands of employees and grew into a dedicated team within Augmented Engineering.
- Worked across the complete application lifecycle - product design, frontend and backend implementation, integrations, deployment, reliability, and developer experience - for an enterprise-scale internal platform.

Senior Engineer, Checkout Extensibility | Apr 2021 - Mar 2025

- Key engineer on Shopify's Checkout Extensibility team, using React and TypeScript extensively to build the Checkout Editor and merchant-facing checkout customization experiences.
- Built complex product interfaces integrated with internal GraphQL APIs and platform services, contributing to systems that power checkout experiences at global scale.
- Drove technical decisions across frontend architecture, API integration, performance, and developer-facing extension capabilities while collaborating across product and platform teams.

Red Ventures | Charlotte, NC

Senior Software Engineer | Mar 2018 - Apr 2021

- Led the engineering team for two years re-architecting ExpertFlyer for The Points Guy Travel as a modern full-stack application with a React/TypeScript frontend and Go backend services.
- Built React/TypeScript product experiences and Go REST APIs/business logic while integrating new services with legacy Java Struts systems during the modernization.
- Separately launched a CreditCards.com advertising portal and built Java backend/data-processing systems and event tracking used across acquired businesses.

ABC Financial Services | Sherwood, AR

Senior Software Engineer | Sep 2016 - Mar 2018

- Helped build a greenfield full-stack platform using React, TypeScript/JavaScript, Node.js, Java Spring, PostgreSQL, and AWS, establishing the React/TypeScript stack used throughout later roles.
- Built user-facing React experiences and a Node.js service layer connecting product workflows to backend services, APIs, and PostgreSQL-backed data.
- Contributed to application architecture, API design, SQL-backed data flows, and product strategy as the platform scaled.

PROFESSIONAL EXPERIENCE - CONTINUED

Arkansas Blue Cross Blue Shield | Little Rock, AR

Systems Analyst Programmer III | Oct 2013 - Sep 2016

- Served in a senior-engineer-equivalent role on a critical database-backed healthcare application used daily by medical facilities across Arkansas and designed to support thousands of users.
- Led modernization, performance, usability, and feature work across the web application, including data-intensive workflows and relational database integration.
- Played a key role in application architecture, SQL/database work, and mentoring junior developers as healthcare requirements evolved.

Baptist Health | Little Rock, AR

Web Analyst | Jan 2012 - Oct 2013

- Developed an internal full-stack application suite for hospital operations, including single sign-on, configurable roles, granular permissions, and database-backed workflows.
- Helped move critical workflows from mainframe systems to modern web applications while working across application logic, identity/access concerns, and relational data.
- Supported and maintained more than a dozen additional applications and databases while modernizing hospital operations.

ADDITIONAL EXPERIENCE

Axiom - Software Engineering Intern | May 2011 - Aug 2011 | Conway, AR

- Automated categorization and documentation of enterprise folder structures using Perl, improving repeatability and reducing manual work.

Army National Guard | Apr 2004 - Apr 2011

- Seven years of service, including an Operation Iraqi Freedom deployment; developed leadership, adaptability, teamwork, and decision-making in high-pressure environments.

EDUCATION

Henderson State University | B.S., Computer Science
